Function Evaluation of Your Current Bath:

Fixtures

- Is the shower head at a comfortable height for all users?
- Is the shower safe (non-slip floor, grab bars)?
- Is the bathtub the best size for the users?
- Is the sink at the best height?
- Are all the fixtures easy to clean?
- Do shower doors have microbial coating?
- Are the doors tempered glass?

Storage Systems

- Are the cabinet doors up-to-date in style and color?
- Is the finish in good shape?
- Is there enough of the correct types of storage?
- Is the storage system well organized?
- Is there a convenient spot for storage in the shower area?
- Are there enough towel bars?

Mechanical Elements

- Is there sufficient ventilation?
- Is the bathroom comfortably warm?
- Is there adequate lighting?
- Are all the electrical outlets protected with GFCI?
- Are the outlets in convenient locations?

Major Surfaces

- Are all the surfaces easy to keep clean?
- Are the walls in the shower free from mildew or dryrot?
- Is the room aesthetically pleasing?
